Groundswell GIBS Solution

Low-Code Budget Lifecycle Modernization for Federal Agencies

60%

Faster deployment
vs traditional
COTS systems

100%

Federal-purposed, not
adapted accounting
software

24,000+

Budget hours saved
annually at a federal
agency using GIBS

Groundswell Integrated Budget Suite (GIBS) supports processing the full budget lifecycle, including alignment of strategy and performance reporting with budget formulation and execution—all within a unified low-code platform. GIBS enables agencies to break free from spreadsheets and siloed systems by offering real-time insights, secure integrations, and workflows that match how agencies actually operate.

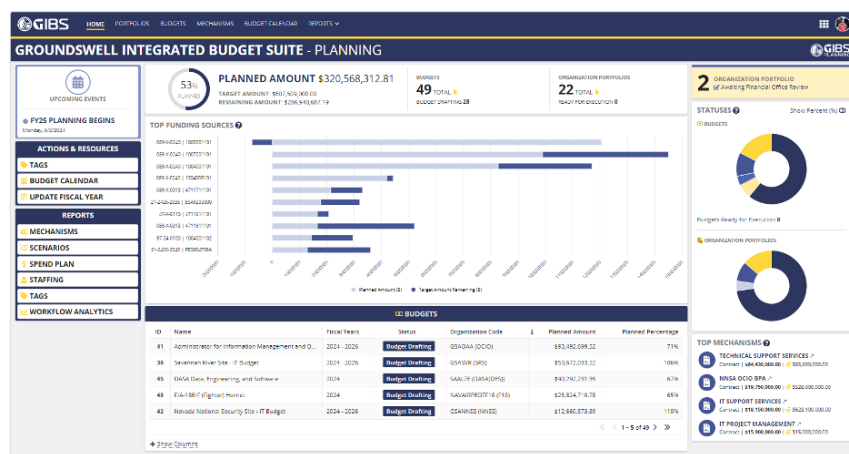

Figure 1. Navigate the budget lifecycle from role-based home dashboards.

Built for Government. Proven Mission Impact.

GIBS was developed to meet federal budgeting requirements—designed, not adapted. Built for federal needs, with deployments across defense and civilian agencies, it delivers faster insight, better fund utilization, and streamlined reporting.

Feature Summary

Comprehensive Lifecycle Modules:

Strategy → Formulation →
Planning → Execution

Real-Time Reconciliation:

Sync planned vs actuals with
financial, acquisition, and other
obligation systems of record

Configurable Workflows:

Budget
spend plans and requirement
workflows and approvals

Role-Based Dashboards:

Interactive views that support
collaboration and accountability

Flexible Tagging & Reporting:

Ad hoc categorization for reports
across programs

API-First Interoperability:

Integrates smoothly with
accounting, acquisitions, HR, and
other financial systems

Why GIBS Outperforms Traditional Tools

What Makes GIBS Different?

Federal-First Architecture: Built for federal agencies—not retrofitted from private-sector accounting tools. Supports complex fund types, hierarchies, staffing, and reporting without workarounds.

Modular & Low-Code: Agencies can implement single modules or the full suite. Configurations are fast, flexible, and sustainable—no heavy developer toll.

No Data Lock-In: GIBS pulls from authoritative sources via REST, SOAP, DB connection, or RPA, and does not require data duplication.

Intuitive User-Centric Design: Smart dashboards, interactive calendars, tagging, and automated reports drive adoption and efficiency.

Award-Winning Performance: GIBS received Appian awards in both 2024 and 2025 for innovation and client impact, recognizing its leadership in modernizing federal budgeting across defense and civilian agencies.
